Professional Summary

B.Sc. graduate with hands-on software and data development experience using object-oriented programming (Python, Java), grounded in SDLC and Agile methodologies. Skilled in troubleshooting, structured problem-solving, and technical documentation, developed through applied AI/ML and data analytics internships. Strong written and verbal communication skills, with proven experience collaborating effectively in fully remote, virtual team settings. Adaptable and quick to learn new technical environments, seeking to build expertise in mainframe technologies within a structured, training-supported role.

Core Competencies

- **Programming Fundamentals:** Python, Java – object-oriented programming concepts
- **Development Practices:** SDLC, Agile methodologies, structured software development workflows
- **Database Concepts:** SQL (basics), MySQL Workbench, data schema and structured querying
- **Troubleshooting:** Structured debugging and issue resolution across data and model pipelines
- **Technical Documentation:** Clear, structured documentation of methods, processes, and findings
- **Remote Collaboration:** Proven experience working effectively with remote/virtual teams

Internship Experience

AI/ML Intern

Nov 2025 – Jan 2026

Infosys Springboard Virtual Internship

- Followed structured SDLC-based development practices to build and deliver an end-to-end technical pipeline.
- Troubleshoot and resolved issues in data processing and model performance, applying structured, methodical debugging.
- Collaborated effectively within a fully remote, virtual team environment, communicating clearly and consistently.
- Documented technical processes and outcomes throughout, supporting clarity and reproducibility.

Data Analysis Intern

Jan 2025 – Apr 2025

INTERNCALL, EVINTERNSHIP PVT LTD

- Applied structured problem-solving to identify and resolve data inconsistencies using SQL-based analysis.
- Prepared clear technical documentation and reports, communicating findings to mentors and stakeholders.

Relevant Project Experience

DermalScan AI – Facial Skin Aging Detection App

Python, TensorFlow, OpenCV

- Applied object-oriented programming principles to build a structured, modular application architecture, achieving 94% accuracy.

Education

B.Sc. in Statistics

2022 – 2025

St. Joseph Degree College

CGPA: 6.93

Certifications

- MS Office & MS Excel Certification – Data Cleaning, Analysis & Visualization
- Statistical Quality Control – Process Improvement Techniques
- Oracle Certified – Generative AI (RAG, Vector Databases, Semantic Search)
- Data Analytics Certification – Thunderbird School of Global Management (ASU)

Additional Experience & Activities

- **Full Stack Web Development Intern** – Karthikeya Software Solutions
- **English Club Member** – Active participant, strong written and verbal communication
